There are many matters belonging partly to
the domain of news and partly to that of literature, which must enter into a daily newspaper;
for these it is not so much either "entoquise" or
contents. for these it is not so much either "enterprise" or expense that is necessary on the part of the conductors of the journal, as a position which gives respect and influence in the community, and causes their sheet to be selected as the medium of communication by these who have anything to tell. In this respect we think ourselves justified in saying that we believe our facilities to be unsurpassed; and if it were proper we might distrate our assertion by a long citation of the distinguished authors and poets whose early compassion first saw the light in our commus, of the public enterprises that were here first discussed, of the public benefits that have here been first announced, and so on. In addition to other facilities,

COPIOUS FILES OF FOREIGN PAPERS, and a large correspondence, afford material for completing this part of the plan, by the jutro-duction of fresh and important matter in great variety. It is hoped the Dully Advertiser may be equally acceptable to the business man, the scholar, the student the politician, the man of the world, and last and not least, to the ladies. While nothing is consitted which any of these classes of readers would rightly expect to find in a public journal, nothing is allowed admission either in the advertising columns or classwhork in the scholar and not least, to the ladies.
